

#### LA SYNTHESE FM

Par Jolan Thomasset & Camille Lanfredi

### Sommaire

- La synthèse FM
  - Définition / Principe de modulation
  - Relation FM / Bessel
  - Opérateurs & Algorithmes
- Synthétiseur complexe PureData

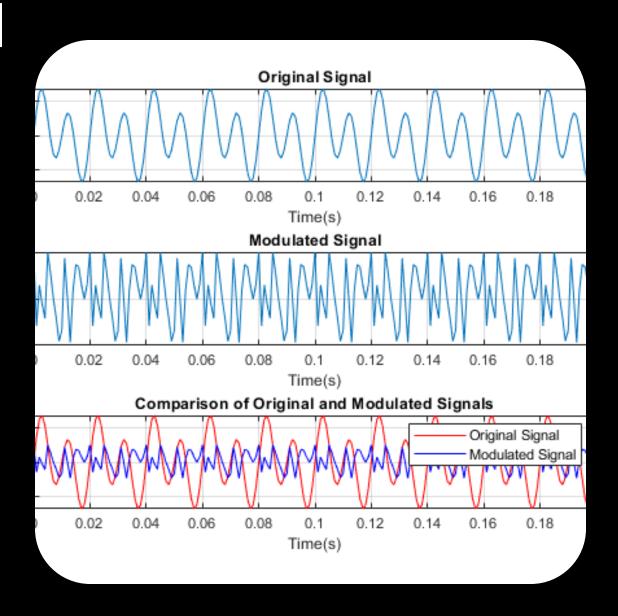

#### Principe de modulation:

Expression:

$$e = A \sin(\alpha t + I \sin(\beta t))$$

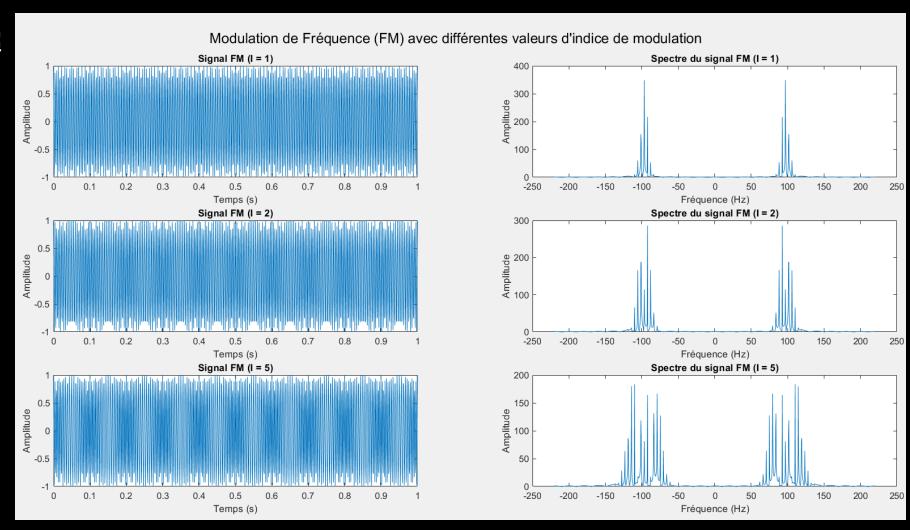

- e = l'amplitude instantanée de l'onde porteuse modulée
- $\alpha$  = la fréquence de la porteuse en rad/ s
- β = la fréquence de modulation en rad/s

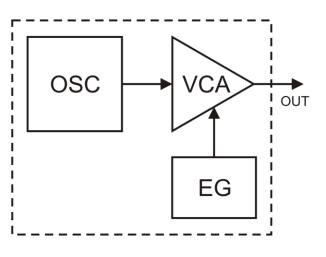

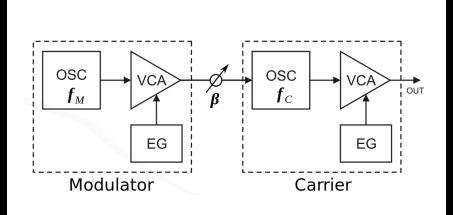

#### **Relation FM/Bessel:**

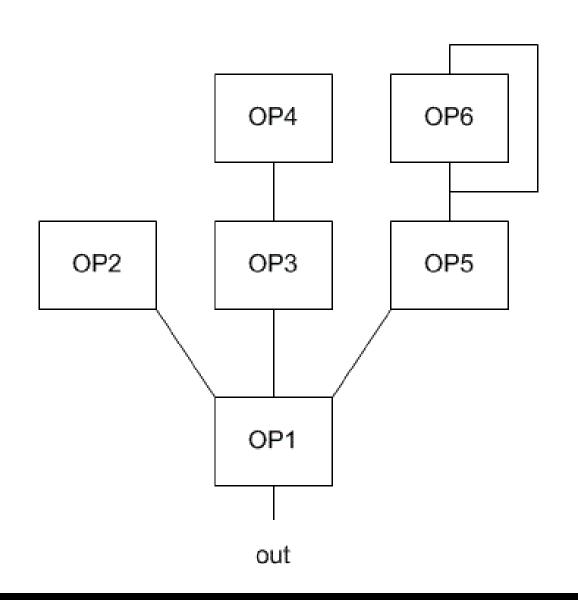

I(t) = JO(kf\*m(t)

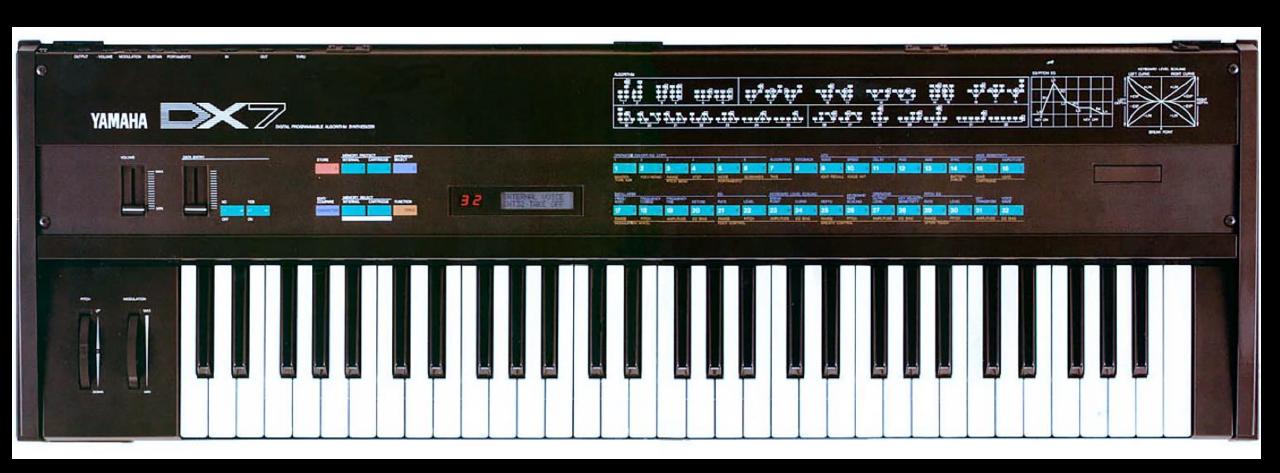

#### Démonstration sur Puredata:
